Executive Summary

This document contains an evaluation of the performance of the workgroup members, following the criteria we have agreed in a meeting before starting the project we decided, and a description of the rewards and punishments we have agreed on.

Revision Table

Revision	Description	Date
v1.0	Sprint retrospective discussion	14/08/2022
v1.1	Definitive version with corrections	16/08/2022

Introduction

The contents of a progress report focus on the evaluation of the performance of the workgroup members, which must be computed according to the procedure on which the students agreed, plus a description of the rewards and punishments.

Contents

As we agreed during our meetings, we arrived in the conclusion that our rewards and punishments and definitions of good and bad work should be the following:

- All these conditions **must be fulfilled** for considering the work of a member as **good**:
 1. All their tasks must be fulfilled within a **reasonable period of time**.
 2. They must have a **fluid and good communication** with the rest of the team.
 3. They must **respect** the decisions of the manager.
- Any of these conditions **can be fulfilled** for considering the work of a member as **bad**:
 1. They do not respect or communicate with the other members of the group.
 2. They do not complete the tasks or achieve the specified deadlines and periods of time.
 3. They made other team members overwork because of the unfinished tasks.

As mentioned in the Workgroup report, at the beginning of summer, we will make a jackpot where each member of the group will contribute 15 euros:

- After finishing the summer, the members of the group that have performed a bad work are forbidden to use the money in the jackpot.
- Those members that have performed a good work during the sprint are allowed to use the money of the jackpot in a group meeting after our september exam.

Performance evaluation:

Member	Performance
Cabra Morón, Manuel	Good
Sánchez Valenzuela, Pablo Aurelio	Good
Stockwell Mendoza, Jaime	Good
Ortega Soldado, Gregorio	Good
Gestoso Torres, Alejandro Manuel	Good
Claros Barrero, Fernando	Good

Conclusions

This sprint resulted to be the longest of all of the sprint, but also resulted to be the one with the best team performance. We had a lot of delayed features and some technical debt added to the actual features of this sprint. But all of our members did an outstanding job to recover the project keeping a good pace and communication. So in conclusion, the performance of the team was more than good in this part of the project.
