# Executive Summary

Across the following paper we describe the planning that has been used by the team to achieve the completion of the criteria requested for the increment of the deliverable 02, as well as an estimated budget of what it would cost to pay for the development.

## Revision Table

Revision	Description	Date
v1.0	Initial draft on sprint 2	06/07/2022
v1.1	Adjustments on the document	08/07/2022

## Introduction

This document is an in depth showcase of our plans regarding time and costs of the sprint 2 for the DP2 subject. During this second sprint, most of the tasks revolve around the creation of multiple entities

# Contents

## Deliverable 2

Task	Role	Time	Cost
IR 01: Detail the user roles	Developer	45 min	11,25 €
IR 02: Creation of the entity Peep	Developer	15 min	3,75 €
IR 03: Creation of the entity Bulletin	Developer	15 min	3,75 €
IR 04: Creation of the entity Ingredient	Developer	30 min	7,5 €
IR 05: Creation of the entity Utensile	Developer	30 min	7,5 €
IR 06: Creation of the entity Recipe	Developer	60 min	15 €
IR 07: Creation of the entity Fine Dish	Developer	45 min	11,25 €
IR 08: Creation of the entity Memorandum	Developer	45 min	11,25 €
IR 09: Creation of the epicure dashboards	Developer	60 min	15 €
IR 10: Creation of the admin dashboards	Developer	60 min	15 €
IR 11: System configuration	Developer	45 min	11,25 €
MR 08: Planning report	Analyst	30 min	12,5 €
MR 09: Progress report	Analyst	30 min	12,5 €
MR 10: UML diagram	Analyst	120 min	50 €
MR 11: Populate the DB	Developer	180 min	45 €
<b>TOTAL</b>	Does not apply	10,5 h dev 3 h manager/analyst	232,5 €

## Cost analysis

The cost of the equipment used on this sprint was around 5700 € for a total amount of 5,2 € of amortization per day on 3 days for a total of 15,6 € on the time of the sprint, which would mean a net profit of 221,9 €

## Conclusions

This sprint was actually a bit problematic as some people are not available to work during large parts of the summer, thus, we are leaving some things as the dashboards or the initial data for a later date, since the group is ready to move on with the tasks of the next sprint. The documentation has proved to be also way easier to write than in the past since we are more accustomed to it after the previous course.
